

Antismog filter element for Hector mask

Instructions

There are two fabric plies for the filter; a black one and a white one. See picture 1 and 2.

- 1) Open the pocket inside the mask (note that there is a Velcro closure)
- 2) Fold the filter; play attention – the white part must be inside
- 3) Insert the filter inside the pocket; insert first the central part first and then sides as you see in pictures 3 and 4

- 4) Insert the side parts; play attention not to damage the leather part of the mask
- 5) Close the pocket using the Velcro sewed at the edge.
